

CHRISTMAS 2021

The orbit's complete, spun round the sun once again.
It's the holiday season, 21's 'bout to end.
The start was with Covid, sieges, riots and the blues,
but we seem on a roll, there's been some good news.
Now let's keep things in check and don't rock the boat.
The world's settling down into a more livable spin,
remember, it's hard to sail in yesterday's wind.

Could there be a lesson to learn the past year after all?
Maybe, the pace during Covid was an overdue stall.
The everyday rushing; hurrying up, only to wait.
A worry of, "Oh no, I must not be late."
Was there really a good reason to never miss a last call?
We should always learn something after a mishap or fall.

As M.M.* suggests and so creatively writes,
things go more smoothly if we catch more "Greenlights".
The best of good fortune is living with a rhythm & rhyme.
I know speeding is expensive and red lights cost time.
But often we stumble throughout a typical day,
this is a part of life's game we are committed to play.
I think of a friend who has the good sense to say,
"Every mile of road has two miles of ditch on the way."
In the New Year, searching on how to live and do right,
whether your beliefs are in Odin, Allah, Santa or Christ.
Perhaps our lives would be better if we work together
and go with the flow smoothly thru all those "green lights".

As is always the case, whatever at Horizon we do, it's
in part skill, hard work, luck, and collaboration with you.
So for this we say "thank you" and want you to know
it's the personal relationships that prompt us to grow.
In 2022 we wish you green lights and light loads
and will end with the ancient saying "Yol Bolsun",
"May you find a road".

Have a MERRY CHRISTMAS!
From your friends at:

*McConaughey, Matthew. (2020). *Greenlights*
