

Gee, is it real? Could it possibly be...
Time to hang up the lights and put up the tree?
And even more startling than a year rushing past
Is the fact that Horizon has turned THIRTY so fast

That's right folks, it was way back in '75
What we know as Horizon was just coming alive
And now that we enter an anniversary year
We reflect on the past and let out a cheer!

We've grown and matured from the very first day
And our friends have grown with us in a meaningful way
Good folks like you helped us rise to the task
To build, so our future looks as bright as our past

We've fine-tuned the focus that gives us our drive,
That keeps our thoughts grounded, keeps Horizon alive
It's our 'quest for the best' in the business we run
While being creative and having some fun

It's been noted before that Horizon is rare
(.... Is he arriving by car or "chopping" the air?)
And to keep things exciting, we found a solution
We've launched a new branch and it's called "Evolutions"

As always our passion is American wood
We still promise a product that's much better than good!
But to see our new interest, what's helping us tick
Hit horizonwood.com - give "Evolutions" a click

And now as we move through this Holiday Season
We think of our friends and understand you're the reason
'Cause the soul of our business, whatever we do
is relationships rich with good people like you!!

Merry Christmas
From your friends at
HORIZON WOOD PRODUCTS
