

The year twenty-ten's quickly slipping away
The elves are real busy, they're loading the sleigh
So, we round up our thoughts, as we do every year
and send out best wishes and good Christmas cheer!

We've been pushing ahead, not just treading the water
With the changes we've made, our work is just a bit smarter
We've tackled new projects, some of them big and some small
Making our wood super-good is the main focus of all

We've closed in more space to protect nature's treasures
And halt the effects imposed by the weather
And in the "green" theme we now keep our space bright
With the sun rays beaming through our prismatic sky lights

Horizon's proud as can be as we test and we tweak
Our new low-waste furnace generating bio-mass heat
And our marketing's making more sizzle and pop
As our customer's learn about the HORIZON eShop*

Of all the good things, some that pleased us the most
Were the dedicated young interns we were lucky to host
Representing both Italy and the United States,
They embraced their jobs, dove right in....their performance
was great!

These days we bounce back from the recession's decline
With a positive nature that's not hard to define
It's the freshness of youth and their imagination
Yes, our kids and their peers will be our nation's salvation!

Wishing you the Merriest of Christmases and
Good Things in 2011

From your friends at
